

Dear Expectant Parent(s),

Hi there! We are John and Bryna and we are so excited and grateful that you are taking the time to read our letter. We haven't met, but hopefully this will help you get to know us a little more!

We met over ten years ago through a mutual friend. It was an instant attraction between us. Our personalities and humor clicked instantly. We dated for 6 years and got married in 2016 in Butte, MT. Our wedding was the most beautiful day and we would relive it again and again. Here we are a little over 4 years later enjoying our newly built home and our 3 loveable dogs, Wahlie (12), Winnie (4), and Willow (1). Wahlie is a chischnauzer, Winnie, and Willow are St. Bernard's. We have been working towards adding a little bundle of joy to our family for a few years. Adoption was an easy choice for us as Bryna has always wanted to since she was 7 years old. It also made it an easy chose because Bryna has known for a long time that she has fertility issues. John is always supportive and very excited for adoption.

Bryna - I grew up in eastern Montana til 12 years old and then moved to western Montana. My childhood was very fun and relaxed in small town America with my parents and older brother. Summers consisted of riding bikes, playing with friends, and going to the local pool. With trips to western Montana to visit our grandparents before officially moving when I was 12. I enjoyed the move to be closer to our family. As a kid, I loved arts, crafts, and the occasional concert I would put on in the backyard or my bedroom! After graduating in 2003 I moved to Seattle, Washington to attend beauty school. I moved back to Montana in 2006 and have been creating beautiful hair ever since.

John - I grew up in central Montana with my parents and an older brother. My brother now has 2 little ones of his own. My childhood was fun. Spent time with my family and running around with my friends in the neighborhood. As a kid I enjoyed riding bikes and playing multiple sports. Name a sport and there's a chance I played it! I also graduated in 2003 and went to college. I'm enjoying my new career of landscaping. I enjoy being outdoors either in the snow or sunshine.

We are both close with our families. Bryna's parents live close so we visit with them often. John's parents are in Montana part time. So, we love to visit John's parents down south in the winter time. Bryna's brother and his wife live down south as well and we love to visiting them. John's brother lives close by with his wife and 2 children. We love getting to see those 2 muchkins. They are very fun and free spirited.

When we are not working, we love to spend our time together. Especially with our 3 four-legged children. We enjoy exploring Montana, we love to travel when we can, cruising our awesome

neighborhood on our bikes, and we love to get to John's parents lake house when we can. We also just enjoy bumming around or watching movies.

We look forward to adding a little one to our family in the future. We are very fun, compassionate, and kindhearted people and we can't wait to expand our family further. We can't wait to experience life with a little one and teach them everything. We also look forward to extending our love to the birth family as well. You can never have too much family and support behind you. Thank you for your time and getting to know us. We look forward to expanding our family.

All our best and support,

John and Bryna
